Introducing our Physicians

James Bui, MD
Dr. Bui specializes in angiography, chemoembolization, dialysis management, liver cancer, peripheral vascular disease - endovascular treatment, PAD, uterine fibroid, varicose veins, venous thrombolysis, and yttrium-90 therapy.

Medical School
University of Southern California
Residency
Northwestern Memorial Hospital

Ron Gaba, MD
Dr. Gaba specializes in interventional oncology (chemoembolization, radioembolization, ablation, biopsy), portal hypertension (transjugular intrahepatic portosystemic shunts [TIPS], variceal embolization), and palliative procedures (celiac plexus blocks, gastrostomy tubes).

Medical School
University of Michigan
Residency
University of Illinois at Chicago
Fellowship
Northwestern Memorial Hospital

Martha-Grace Knuttinen, MD
Dr. Knuttinen specializes in angiography, chemoembolization, interventional oncology, liver cancer, pelvic congestion syndrome, endovascular treatment, PAD, uterine fibroid, varicose veins, spider vein treatment, venous thrombolysis, vertebroplasty, and yttrium-90 therapy.

Medical School
Northwestern University
Residency
University of Illinois at Chicago
Fellowship
Northwestern Memorial Hospital

Jeet Minocha, MD
Dr. Jeet Minocha has a specific interest in Interventional Oncology, including therapies for liver, kidney and lung cancers, treatment of varicose veins, PAD, and placement and retrieval of inferior vena cava filters. He is available for consultations on all minimally invasive, image-guided procedures.

Medical School
Northwestern University
Residency
Northwestern Memorial Hospital
Fellowship
Northwestern Memorial Hospital

about Intervventional Radiology

The University of Illinois Hospital & Health Sciences System is home to a team of Interventional Radiologists who provide patients with cutting-edge interventional techniques to dramatically reduce the pain, risk and recovery time for patients. We treat a wide range of conditions including cancer, peripheral artery disease (PAD), varicose veins, and uterine fibroids.

Our specialists replace traditional surgery with minimally invasive techniques and small instruments. We provide a full range of interventional services, including varicose vein ablation, uterine fibroid embolization (UFE), interventional oncology therapies (such as liver and colon cancer treatments), and other state-of-the-art services. With a team of dedicated interventional radiologists, we are always available to take care of the needs of our patients and referring physicians.
