Kinh Luan D. Phan, MD
Professor of Psychiatry
Directs Mood and Anxiety Disorders Program
and Translational Research
Dr. K. Luan Phan’s clinical and research expertise involves the cognitive and affective neuroscience of anxiety and mood disorders and their treatments across the lifespan. Dr. Phan has active funding from the National Institutes of Health, Department of Veterans Affairs, and the Department of Defense. He is a contributor to several clinician scientists with NIMH and VA career development awards. Dr. Phan has a joint appointment at the Jesse Brown VA Medical Center and is a member of several editorial boards, scientific councils, and grant review panels.

Marcela Almeida, MD
Chief of the Women’s Mental Health Service and a Director of the Mood and Anxiety Disorders Program.

Sean Conrin, MD
Chief of the Division of Clinical Research in Psychiatry, Psychiatry, and Neurology.

Jinger Hoop, MD
Chief of the Department of Psychiatry and Neurology.

Rachel Jacobs, PhD
Director of the Child Psychiatry Program and an Associate Professor of Psychiatry.

Sittanur Shoush, MD
Director of the Women’s Health Clinic and the Women’s Mental Health Fellowship.

Teresa Sripada, MD
Director of the Adult Psychiatry Fellowship.

about the UI HEALTH SYSTEM PSYCHIATRY DEPARTMENT

The University of Illinois Hospital & Health Sciences System Department of Psychiatry has added several junior and senior faculty members with specific areas of expertise in both research and clinical practice, in the subspecialty programs of Mood and Anxiety Disorders, Psychotic Disorders and Women’s Mental Health.

Our clinicians and clinician-scientists bring a wealth of knowledge of the biological and pharmacological mechanisms of mood and anxiety disorders, including post-traumatic stress disorder, through out the lifespan, as well as during the pre- and postpartum period. They are also experts in the evaluation and treatment of affective disorders, and in the treatment of lifelong psychotic disorders, such as schizophrenia.
